CONCRETE PAVEMENT REPAIR seminar & demonstration

**SEPTEMBER 24
MANHATTAN**

**SEPTEMBER 25
PARSONS**

The Kansas Ready Mixed Concrete Association (KRMCA) is proud to present its 2014 Concrete Pavement Repair (CPR) Seminars. These seminars will provide persons responsible for street maintenance and repair, the knowledge necessary to maintain quality concrete streets. Durability, Ordering Concrete, Standard Submittals, Concrete Curb & Pothole Repair, Curing, and Mix Design will be the topics discussed at the seminar. We will also have a live demonstration of a concrete patch.

WHO SHOULD ATTEND?

- Architects
- Engineers
- Contractors (Subs & General)
- Inspectors
- Anyone responsible for the design, construction and repair for street maintenance.

WHAT DO YOU GET?

- 4 Continuing Education Credits
- PDH's for Engineers
- AIA CES, HSW for Architects
- Education Hours for Contractors
- FREE:Includes Lunch and all course materials

Register Online till Sept. 22 at

Questions, call (785) 235-1188

FROM THE MANAGING DIRECTOR

Summers always go fast!! Now the kids are already back in school, football is underway and most of you, I hope, are all pushing for a strong Fall finish. Just as we have been doing here at the Association.

In August, we saw many of the projects we have been working on come together. Probably the most visible was

the “going live” with the Association’s new web page and database software. Both Amanda and myself devoted quite a bit of time to this effort and are optimistic about the benefits it will provide our membership. If you have a moment please log on at www.kapa-krmca.org and take it for a test drive. Then, when you are done, drop us an email or call to let us know what you think and suggest any improvements. The new site and database are loaded with several sophisticated tools but they are only as good as having the knowledge to use them. Knowing what you need will help us put them to the best use. Some parts of the site are still getting their final touches. One of those is the “Members Only” section. Soon we will be sending out login information to all members to access this part which will provide a great deal of information that is NOT available to the general public. This vital industry information is one of the great member benefits of the association and we hope you will fully utilize it.

This past month we continued our work with KDOT on the D-Cracking issue and we now appear to have it resolved. My appreciation to Kelly Briggs, Frank Rockers, Phil Mott, Rusty Owings and Joe Hug for all of their assistance as we have worked our way through this process. We have also been busy planning for our Fall finish which includes four educational seminars scheduled for late September and mid October in Manhattan, Parsons, Wichita and Lawrence. Once again our appreciation to all of the volunteers who have stepped forward in helping us produce these programs. These programs are valuable as they serve as our main outreach to those whom use our products. We urge you to check them out online and make every effort to get your customers there.

Finally, I cannot close without once again reminding you that the Birdie Bash is just around the corner. Please take time to get your team organized and get signed up. The Birdie Bash is a wonderful opportunity to have a great day with your customers, on a great course and support a worthwhile cause all at the same time.

And as always, if you have any comments or would like to suggest any improvements, please do not hesitate to write, text, email or call.

Woody

GOT News??

KAPA-KRMCA doesn't want to miss what's happening with your company. If you have any company news, campaigns, or industry updates please do not hesitate to send them our way to aschuster@kapa-krmca.org

REGISTER YOUR TEAM TODAY! SUPPORT THE KANSAS CONSTRUCTION INDUSTRY

8:00 a.m. Registration & Breakfast • 9:30 Shotgun Start

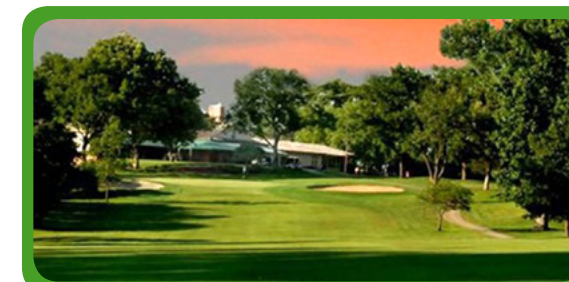

The Kansas Construction Industry will host their annual Birdie Bash Golf Tournament on October 2, 2014 at the Topeka Country Club! Team registration is now available online at www.kapa-krmca.org where you can also sign up for sponsorships. The committee welcomes any prize donations from industry members to put toward the putting contest as well. Please contact the association office if you would like to reserve your team, sponsorship or prize at (785) 235-1188.

Place: Topeka Country Club
 2700 SW Buchanan St.
 Topeka, Kansas

Time: Registration 8:00 a.m.
 Shotgun 9:30 a.m.
 Awards and lunch immediately follow event

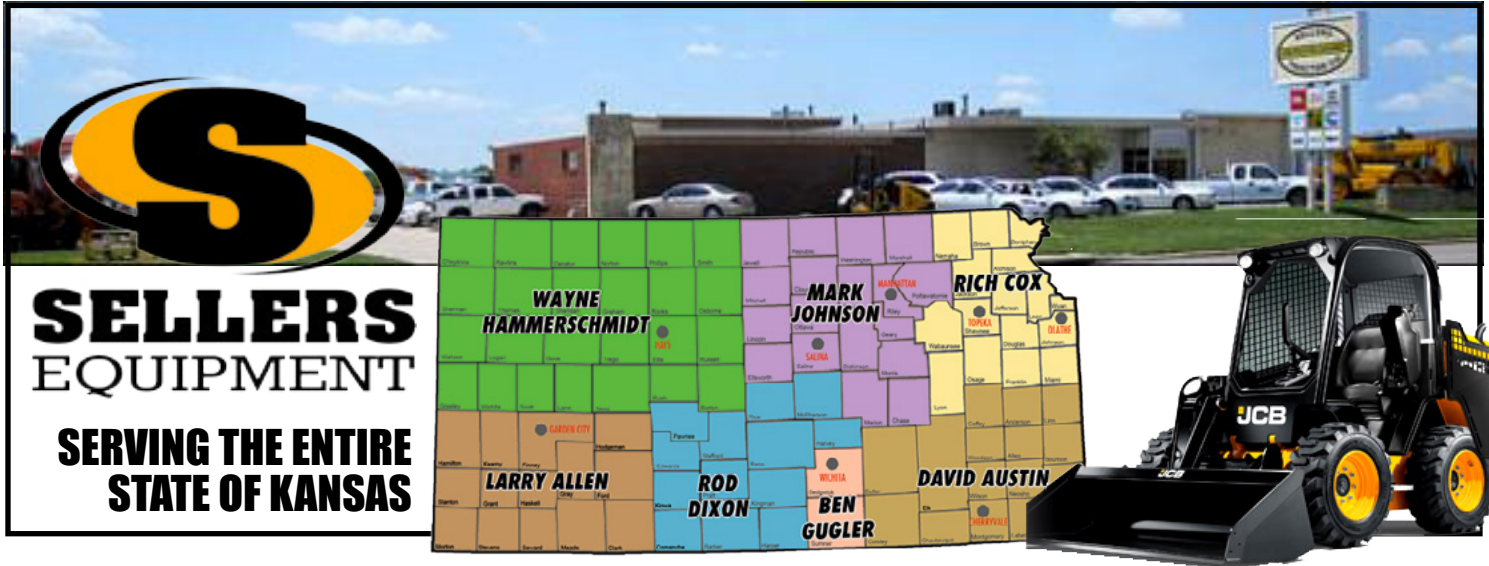

Entry Fee:
\$150.00 per person. Includes Golf, golf cart, skins participation, putting contest fee (19th hole), fantastic prizes, giveaways, breakfast, refreshments (aka beer cart), buffet luncheon and much more! 4-Person Format.
\$25.00 per person to get in the door and eat buffet luncheon.

Prizes:
 Three Flights
 1st place
 2nd place
 3rd place
 Longest Drive
 Closest to pin
 Longest Putt
 Hole-in-one prizes

WE NEED YOUR HELP!
 Please Sponsor a Hole or Donate a Prize

MEMBER SPOTLIGHT

Who We Are: Sellers Equipment provides adequate shop and field service facilities. Maintaining service equipment, and tools, staffed by capable, willing people is a priority of Sellers Equipment. This assures that all customers get the maximum performance and economical operation from machines purchased or rented.

What We Do: It is also Sellers Equipment's duty to perform a PARTS service for its customers. This is done by maintaining an adequate supply of fast moving and insurance parts for the machines we sell. These repair parts must be available to our customers night or day. Sellers Equipment knows that down time is bad and can be very expensive to its customers. Another one of their duties is to perform Sales & Rental service. Sellers Equipment sell and rent only the products which will prove beneficial to its customers in a type and manner which can be afforded.

History: On October 1, 1947, Ben A Sellers founded Salina Tractor Company, Inc., in Salina, KS. The distributorship represented Allis-Chalmers, Schield-Bantam, and several other lines. In October 1955, Salina Tractor moved into a totally new facility in Salina. Six years, later the initial territory of 28 north central and northwest

Kansas counties expanded to 42 counties. Then in May 1969, A new "brother" company was formed under the name of Sellers Tractor Co., Inc., in Wichita, KS. The name of Salina Tractor Company was also changed to Sellers Tractor Company. In 1973, Sellers Tractor Co., Inc. of Wichita expanded its operation into 22 southwest Kansas counties and its Salina location expanded its operations into northeast Kansas by establishing a facility in Topeka, which completed coverage of the entire State of Kansas. Then in February 1976, Southwest Kansas operations moved from Dodge City into a totally new facility in Garden City and Sellers Tractor Company became a distributor of HYSTER lift trucks. In April 2006, Sellers Tractor continued their growth by opening yet another new location in Olathe to serve the Kansas City area. For more information about this month's Member Spotlight, visit www.sellersequipment.com.

About Member Spotlight: To increase membership benefits and recognition, one company per month will be chosen at random to be featured as the Member Spotlight. If you have any questions about the program, please contact Amanda Schuster at aschuster@kapa-krmca.org.

Central Plains Cement is pleased to announce that Kameron Williams their Technical Services Engineer has accepted a promotion as Technical Services & Logistics Manager. In addition to his technical engineering role, he will help initiate our strategy and achieve our goals within our transportation system. Kameron will continue to work from our administrative office in Sugar Creek and working with the Sugar Creek and Tulsa cement plant markets.

Additionally, Cole Jacobs has accepted the position of Sales Manager. Cole comes from Martin Marietta Materials, Inc. Rocky Mountain Division as District Sales Manager – Aggregates. Cole brings extensive experience in cement, concrete and aggregates and is a graduate of Middle Tennessee State University's Concrete Industry Management Program and has as an M.B.A. from The University of Colorado. Cole's office will be at our administrative office in Sugar Creek and will be working between the Sugar Creek and Tulsa cement plant markets.

QUARRYMEN INSURANCE AGENCY

Tom O'Donnell
quarrymeninsurance@gmail.com
 P.O. Box 23007
 Overland Park, KS
 (913) 220-2274

Tom O'Donnell has left his former agency and started a new one, Quarrymen Insurance Agency. Tom has been a member of the aggregate industry for many years, serving on several committees and contributing to many events such as the Birdie Bash golf tournament. Tom was also one of the founders of the Kansas chapter of the Joseph A. Holmes Safety Council that works with quarries and promotes safety with the industry.

Having over 35 years of experience in the insurance business and now with his new agency, Tom supports and specializes in quarries and construction related companies. He has spoke to the industry on work compensation safety with aggregates. His vast years of growing up with the family construction business taught him how the construction and aggregate business works. Tom supports the industry and KAPA's mission. Call him for your help in safety, insurance, noise and dust tests, MSHA or OSHA help.

KAPA Research & Specification and KRMCA Technical & Quality Control

The KAPA Research & Specification and KRMCA Technical & Quality Control Committees met August 6, 2014 in Topeka. The meeting was jam packed with a number of items on the agenda.

First up, committees heard a presentation from Dr. Matt O'Reilly from the University of Kansas' Department of Civil, Environment & Architectural Engineering on their ongoing research of concrete durability. Dr. O'Reilly presented laboratory tests, field work, and the effects that curing has on concrete durability. A good group discussion and Q&A followed the presentation.

Next, the committee was updated on the new Pre Qualified Materials List (PQL) and Part V Specification changes. The PQL list can be found online at <http://ksdot1.ksdot.org/burmatrres/pql/default.asp>. Part V is in the process of being merged online. Currently only the whole book is available, but a Part V link will be available soon. Standard Submittal forms were also discussed. They get updated regularly on KDOT's website. You must access them with a login and password. You will also be able to access them through our Members Only section of the www.kapa-krmca.org website as soon as that part is ready to be released.

Some other issues the committees discussed were air void analyzer and petrographic analysis testing and some timing issues between contractors and producers when it comes to approval and mix designs. The producer needs about a 90 day window for approvals & mix designs and the contractor needs to allow a fair amount of time for the preparation. A good discussion stemmed around testing and timing.

Durability and curing continued on as a discussion throughout the meeting. The committee has decided to update some brochures that producers and the Association use for promotion, *Guidelines For Durable Exterior Concrete* and *A Contractor's Guide for Quality and Durable Residential Flatwork*. The brochures will be updated and new ones printed soon.

The committee meeting wrapped with some discussion on curing concrete and the need to educate the industry about it. An announcement was also made to put the ACI Contractor Day on the calendar for April 15, 2015.

The next meeting of the KAPA R&S and KRMCA TQC Committees will be held in November with details announced soon. As always all members are welcome to attend any of the Associations committee meetings.

KAPA-KRMCA MEMBERS ONLY Logins-Coming Soon!!

Recently, KAPA-KRMCA implemented a new website and database. As part of your membership benefits you get access to our "Members Only" section of the website which provides even more information specific to producers, committees and the industry. You will also be able to register for events at special member pricing and utilize the auto-fill feature for future registrations. We also plan to have our "Lunch & Learn" online education program ready soon. This will be a great tool for members to utilize when it comes to training and resource materials as you will be able to download full presentations over industry topics that have been conducted.

We are still in the process of getting the "Members Only" section set-up. As soon as all the login information is generated we will send out a login and password for each member to use. Once you have logged in, you can change the password to whatever you want. We look forward to providing some of these new and improved member benefits for you. As always do not hesitate to contact us with any questions or suggestions at (785) 235-1188.

KDOT Local Consult Meetings

KDOT and KTA are looking forward to this year's local consult meetings being held throughout the state. This is a great opportunity for our state transportation agencies to hear what is most important to local communities in addressing future infrastructure needs.

Please register in advance! In order to gain some insights about topics of regional importance, you are invited to pre-register for the local consult meetings by filling out this short survey: [pre-registration survey](#).

For additional details, visit www.ksdot.org/LocalConsult/LocalConsult.asp or contact Tammy Torrez at tammyt@ksdot.org or (785) 296-2153.

House Bill will Stop EPA from Expanding Federal Regulation of Water and Wet Areas Vote Expected Next Tuesday – [Send a Letter Today!](#)

Next Tuesday, the House is expected to vote on [H.R. 5078](#), the Waters of the United States Regulatory Overreach Protection Act. This bill would halt the U.S. Environmental Protection Agency (EPA) and U.S. Army Corps of Engineers' (Corps) [proposed rulemaking](#) that redefines "waters of the U.S." under the Clean Water Act (CWA). The legislation will prevent the agencies from going forward with a vast expansion of regulatory authority that is inconsistent with Supreme Court decisions and, in many times redundant with state regulatory authority.

The bill also requires the agencies to rewrite the rules in consultation with state and local governments to form recommendations for a consensus regulatory proposal. [Tell your Representative](#) to vote in support of this important legislation.

CONCRETE ROAD & STREET MAINTENANCE SEMINAR A Kansas Road Scholar Level I Technical Skills Program & Road Maintenance Course

About the Course: This course presents the practices of designing, constructing, and rehabilitating concrete pavements.

Course Topics:

Basics of Concrete
Resurfacing & Reconditioning Concrete
Admixtures
Concrete Finishing
Full Depth Reclamation
Ordering & Delivering Concrete
Decorative Concrete for Special Projects
Question & Answer; Evaluation & Adjournment

Speakers:

John Caldwell, Western Material & Design
Joe Hug, Monarch Cement Company
Richard Mfuko, Andale Ready Mix
Mike Murray, Decorative Concrete, Inc.
Rusty Owings, Euclid Chemical
John Pendry, Midwest Concrete Materials
Amanda Schuster, KRMCA

Who Should Attend: This course is designed for maintenance crews, foremen and supervisors who have responsibility for providing maintenance on concrete pavements. This also includes county and city engineers, road supervisors, technicians, road and crew members, township trustees, and tribal officials.

Dates and Locations: The 2014 Concrete Road and Street Maintenance Workshops will be held at the following locations.

October 14, 2014 • Wichita

Eugene M. Hughes Metropolitan Complex
5015 E. 29th Street N

October 15, 2014 • Lawrence

KU Burge Union (Main Campus)
1601 Irving Hill Rd.

Registration: The registration fee is \$75 and includes lunch, breaks, and workshop materials. To register, complete the registration form, at <http://www.ksltap.org>—go to the training calendar, click on the workshop you wish to attend.

TOUCH A TRUCK ATTRACTS CROWD TO DOWNTOWN TOPEKA

BY MEGAN HART
CJONLINE.COM

The “Touch a Truck” event’s organizers ordered more than four times as many T-shirts this year as they had last year, and they still were running low with more than two hours to go.

The event allowed children to climb into large vehicles used for public safety, construction and other purposes from 9:30 a.m. to 2 p.m. Saturday near downtown Topeka. To get the T-shirts, they had to get signatures on a “passport” from the operators of 20 trucks to prove they had visited a variety of vehicles, said Edie Smith, director of marketing and membership for Downtown Topeka Inc.

Last year, they had only 150 shirts, and ran out within an hour, Smith said. This year, they had about 600 shirts and started running low by noon, despite the fact that the kids had to collect 20 signatures this year, up from 15 last year. Several people offered to buy the shirts, but the point is to teach kids about construction and public safety, she said.

“Every year we try to get bigger and better,” she said.

Zach Snethen, one of the organizers of the event, estimated between 3,000 and 4,000 people attended. They gave out 2,000 “passports” to children and gave out all 600 T-shirts, he said.

“We were very pleased with the response of participants and attendees and plan to take the event into its third year next year over Labor Day weekend,” he said.

Organizers moved the event to the 700 and 800 blocks of S.E. Quincy this year to avoid construction on S.

Kansas Avenue downtown. More than 30 large vehicles used for construction or public safety lined the street Saturday morning, and a sand pile provided by Kansas Sand & Concrete, Inc. attracted kids who used toy versions of some of the big equipment to set up their own construction sites — or bury each other.

Admission was free, but organizers requested each family bring a nonperishable food item for Harvesters. Snethen estimated they collected at least twice as much food as they had at last year’s event.

New elements included a children’s activity area, where the Kansas Children’s Discovery Center and other groups had set up activities like building towers with wooden blocks, coloring and balloon animals. Stands selling HHB BBQ and Italian ice also were new this year.

As usual, the main attractions were the trucks. Many of the bigger trucks drew lines, with a Topeka fire engine attracting

plenty of attention. Another apparent favorite was the Harvesters’ tractor-trailer, where children and their parents could take a brief ride on the platform used to lift heavy items into the truck.

Nikki Babcock said she brought her son Roman, 5, and daughter Alyssa, 4, because they love construction equipment and enjoyed the event last year.

“They get excited when they see diggers and cranes,” she said.

A number of people have already asked how to participate in next year’s event. If you work in the construction industry, or a generally related field, please email Zach Snethen at zjs@htkarchitects.net and he will keep your contact information for next year’s event. In addition to the equipment, financial sponsorships are how Downtown Topeka continues to make this happen.

“I am very happy to see that this is turning into a regular community event in celebration of Labor Day. I can see this growing into a career fair type event giving people of all ages exposure to the design, service and construction fields-but still keeping it fun,” Snethen said.
